

## Your voice is Juno's command

### Capturing and sharing lesson content is finally easy

At last, the all-new Juno® digital communication platform has arrived, allowing busy teachers to use the time-saving, results-boosting power of lesson capture. If you can say "begin" and "finish," Juno can handle the rest!

Like magic, Juno's exclusive lesson capture feature records teacher and student voices, media audio, and the computer screen; automatically titles the content with the right subject based on your schedule, and helps you post it for students to review at night — all in a format viewable on Windows® or Mac®, smart phones, and more. For your students who have missed class or are struggling with content, the ability to review lessons at night can make all the difference in their success – not to mention save you time in having to re-teach!

*Like magic, Juno's exclusive lesson capture feature records teacher and student voices, media audio, and the computer screen; automatically titles the content with the right subject base.*

### Getting to Know Juno – The World's Most Advanced Classroom Communication Tool

- **Easy & completely portable** – Juno's speakers and receiver are in one ready-to-use tower. No cords, no special knowledge, and no big time commitment needed. The intuitive design of Juno's LCD touch screen, microphones and software allow you to spend more time teaching and less time fiddling with difficult equipment.
- **Superior sound and coverage** – Because Juno is a digital multi-speaker 2.1 array rather than a single point source, Juno delivers excellent stereo sound coverage that reaches each and every student. Juno combines the convenience of a portable audio device with the sound quality and educational benefits of an installed system. It is also the one classroom communication tool that addresses the needs of many in a neat, simple design that allows solutions to be accessible only when necessary.
- **Seamless integration with multi-media and personal FM systems** – Juno easily connects to laptops, interactive whiteboards, mp3 players, and more to support more engaging and inclusive learning.
- **As basic or advanced as you need it to be** – Whether you want basic classroom sound throughout the room with a 5-minute setup, a fully installed media center, or anything in between, Juno can make it happen. There when you need it — and invisible when you don't — the Juno software serves as your gateway for add-on features and updates (including up to six additional speakers, desktop software, and up to four simultaneous student microphones).
