

# Is the Sound Quality in Your Meeting Rooms Costing You Money?

**W**hen your meeting room sound systems are difficult to use or provide shoddy sound, you run the risk of upsetting your guests and losing business. You also create more headaches for your audio/visual team.

## How the FrontRow ToGo Can Help

With the ToGo, exceptional sound is made simple. The ToGo is an installation-free, completely portable sound amplification system that evenly distributes a speaker's voice throughout any conference room – no matter how big or small. You can carry it from room to room (or even use it outdoors), without ever having to worry about complex cables. That's because the ToGo's receiver, speaker, and battery are all integrated into one easy, light-weight unit. And with the optional CMBT Bluetooth® audio receiver, you can pair the ToGo with phones, TVs, tablets and other Bluetooth-enabled devices to wirelessly play audio.

## Long-Term Cost Savings

Constantly having to rent out A/V equipment gets expensive – and is like throwing money away! By making a one-time investment in the ToGo, you'll have high-quality sound amplification in-house and at your disposal for years to come, without ever having to worry about unexpected costs.

## Better Sound for Better Business

Don't let poor sound quality or hard-to-navigate controls sacrifice the reputation of your hotel. Instead, offer your guests the best in portable sound amplification with the ToGo. To learn more about what the ToGo can do for you and your business, call **1-800-227-0735** today.
