

# CMBT Bluetooth® Audio Receiver Module

## Self-contained Bluetooth receiver

Say goodbye to cables and hello to convenient Bluetooth connectivity. The CMBT audio receiver module makes it possible for teachers to play their multi-media audio through any Bluetooth-enabled device. Now instructors can conveniently play songs and lessons from phones, TVs, tablets and other Bluetooth-enabled technology. For additional convenience, customers accessorize their classroom with the CB55 (separate product – see below for more details), which provides a wall-mounted option to enable Bluetooth pairing.
