

Strobe Light For Conductor

Add Visual Notification to Calls and Alerts

FrontRow Conductor is a flexible and scalable audio-over-IP communication system for schools, providing paging, intercom, bells, and alerts.

Add this powerful strobe light to any Conductor system to enhance audio announcements and alerts with a flashing visual beacon.

When connected to an Admin Station in the office, the strobe can flash whenever a call or alert is received to ensure everyone sees it.

Install in hallways or large rooms to provide additional notification that an important announcement is playing, keeping students and staff safe and informed.

Conductor supports simultaneous audio and control actions, so you can trigger announcements, lighting, door locks, digital signage, and more with a single button press.

Connect the Strobe to DC power and trigger using a contact closure relay on the FrontRow CM800 or CM800Si.

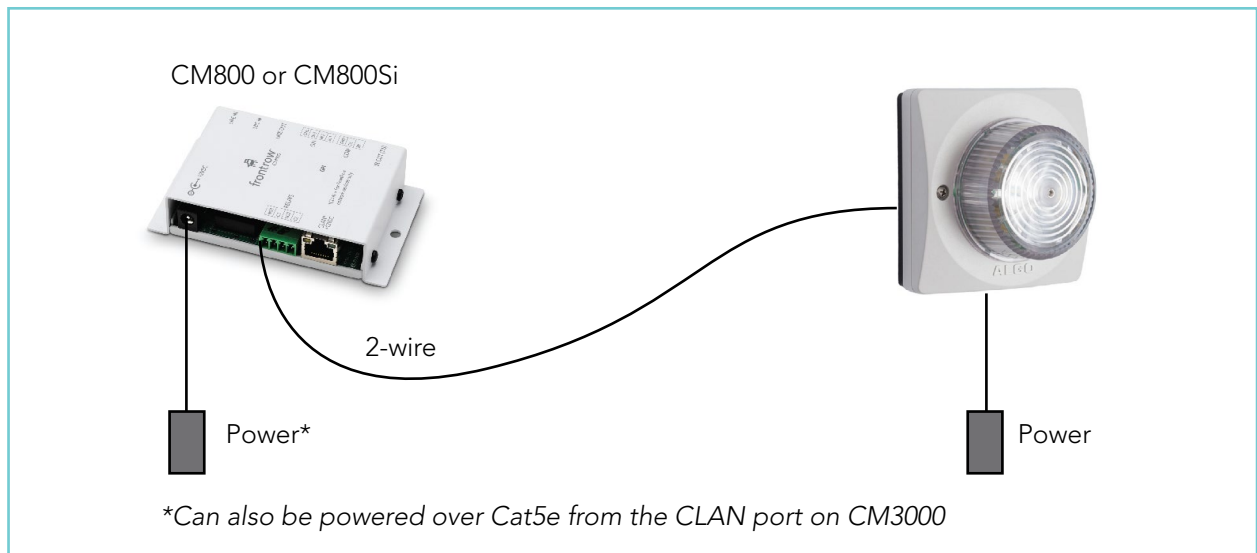

FrontRow Part # 6400-00012

FR-ADMIN station

Wiring

Specifications

Trigger options:

- Dry contact closure input (Max 1kOhm)
- Ringing from FXS port or phone line (20/25 Hz 20Vrms minimum)
- Auxiliary input detection (3-30V DC or AC rms)

Optical: 8 LEDs 643 Lumens, 198 Candela

Patterns: 16 selectable using 4 position switch

Mounting: double-gang box or any flat surface

Environmental: -4 to +122 deg F (-20 to +50 C) 10-95% RH non-condensing. Rated for IP65. Dry indoor location only unless wiring cavity protected from water ingress using supplied gaskets or other protective measures.

Power: 12VDC 750mA / 24VDC 375mA

Compliance: EN60950:2001, RoHs, CE, FCC, CSA/UL

Includes: DC Power Supply, mounting kit, strobe with clear lens, red lens, blue lens, amber lens.

Suitable for OSHA and ADA compliance when properly located and configured. *NOT intended for fire alarm signaling applications.*

Key Benefits

- Provides visual alerting along with Conductor audio announcements
- Easy to install and trigger from FrontRow devices
- Customizable patterns and included colored lenses for flexible application usage, from gentle call notification to aggressive flashing for alerts, to solid illumination
- Helps schools meet OSHA or ADA compliance
