JUNO CONNECT CONDUCTOR UPDATE GUIDE

CONTENTS

Introduction	Page 1
Step 1 Log into the Webmin interface on your DRS-5000	Page 1
Step 2 Upload the script to the DRS-5000	Page 2
Step 3 Execute the script on the DRS-5000	Page 3
Step 4 Restart the DRS-5000 server	Page 4

Introduction

In order for Juno Connect to work with the Conductor system, the system (DRS-5000 server) must be configured to recognize and support the new device. This configuration is done on the server and thus cannot be accomplished through any settings available on the client application.

This document will guide you through updating the Conductor system using a simple four step process. Please follow the steps in order to update your DRS-5000 server using the provided **conductor_juno_update.pl** script. If you do not have the script, please contact FrontRow.

Step 1: Log into the Webmin interface on your DRS-5000

1. Connect to the Webmin management interface

- Open a web browser and type in the URL of your FrontRow DRS-5000 server followed by :10000. See the example below

http://192.168.1.99:10000

- Log into Webmin by entering your credentials:

- Once logged in you will see this screen:

Step 2: Upload the script to the DRS-5000

1. Navigate to the Upload page

- Click **Others** from the left hand menu
- Choose **Upload and Download**
- Click the **Upload to server** tab

2. Upload the *conductor_juno_update.pl* script

- In the **Files to upload** section, click on the first **Choose File / Browse** button (depending on your browser)
- In the new file chooser window, navigate to the place where the *conductor_juno_update.pl* file is located on your local system; choose the file and click on the **Open** button
- In the **File or directory to upload to** field, enter:
`/home/ccsadmin`
- The window should look something like this:

Download from web **Upload to server** Download from server

This page allows you to upload one or more files from the PC on which your web browser runs to the system running Webmin.

Upload files to server

Files to upload

Choose File conductor_juno_update.pl Choose File No file chosen

Choose File No file chosen Choose File No file chosen

File or directory to upload to

/home/ccsadmin ... Create directory if needed?

Owned by user

root ...

Owned by group

Default ...

Extract archive or compressed files?

Yes, then delete Yes No

Send email when uploads are done?

No Yes, to address

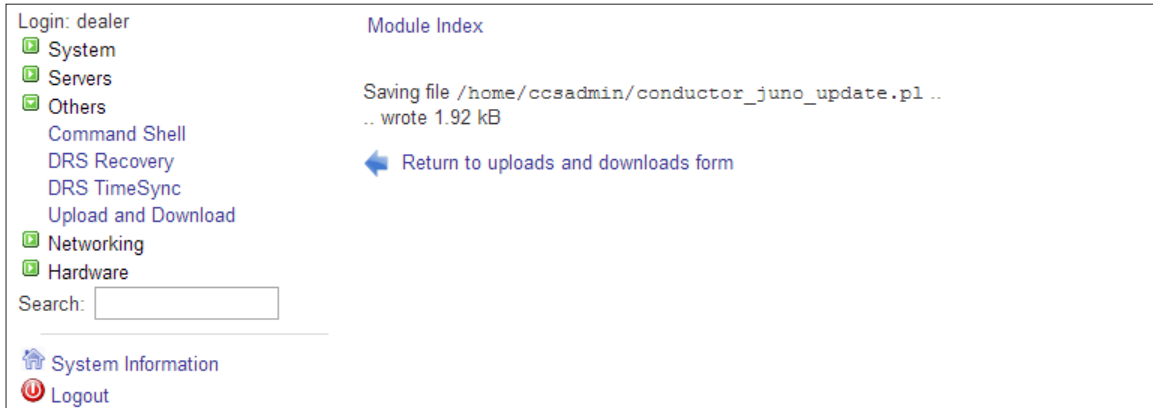

Upload

- Click the **Upload** button

Step 3: Execute the script on the DRS-5000

1. Navigate to the Command Shell page

- Click **Others** from the left hand menu
- Choose **Command Shell**

2. Execute the *conductor_juno_update.pl* script

- In the **Execute command** field, enter:

```
perl /home/ccsadmin/conductor_juno_update.pl
```
- The window should look something like this:

- Click the **Execute command** button and you will see the Update complete message below:

```
> perl /home/ccsadmin/conductor_juno_update.pl
Update complete.
```

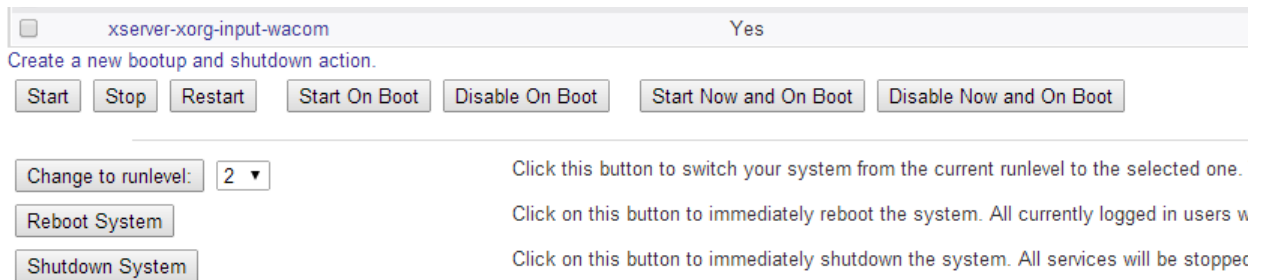

Step 4: Restart the DRS-5000 server

1. Navigate to the Bootup and Shutdown page

- Click **System** in the left hand menu
- Choose **Bootup and Shutdown**

2. Restart the system

- Scroll to the bottom of the page
- Click the **Reboot System** button

- Once things have restarted, you may use the Conductor Console client application to add Juno towers which have the Juno Connect hardware module installed. Please see the Juno Connect documentation for details.
